GEOLOGICAL

TABULAR STATEMENT OF MATTERS OF ROUTINE FOR APRIL 1912.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
1	1840 ...	1	Mr. Harishankar Nandaram, Bangalore	With reference to his complaint that the agents of Mr. H. Doune are obstructing him in his work of collecting corundum in the Mysore Taluk under the license held by him therefor, invites his attention to the terms of the said license in regard to vested interests and rights granted by Government prior to the issue of his license, which have to be duly respected by him and forwards a list of licenses granted to others in the said taluk prior to the issue of his license.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
2	1856	...	9	Dy. Comr., Chitaldrug ..
				With reference to his suggestion that the license granted to Ambanna for collecting corundum in the Parasurampur hobli of the Challakere Taluk be held in abeyance pending the disposal of a criminal case against the licensee for unauthorized collection of corundum, invites attention to the terms of the license under which corundum can be removed only on permits from the Amildar and requests the Deputy Commissioner to instruct the Amildar, if necessary, not to issue permits pending the disposal of the case.
3	1859	...	10	Mr. Katte Venkataraman- aiya, Parigi village, Hindapur Taluk
				Permits him, under certain conditions and, as a special case, to remove for sale certain quantity of corundum collected by him in certain villages of the Maddagiri Taluk under exploring license No. 147, and calls for a report as to the quantity of corundum sold and the amount of royalty paid thereon.
4	1860	...	10	Dy. Comr. Tumkur ...
				Forwards a copy of the above for his information and calls for a report as to the quantity of corundum permitted to be removed and the amount of royalty recovered thereon.
5	1869	...	11	Mr. Nabi Saheb of Hindu- pur
				With reference to his application for a license to collect corundum in the Maddagiri Taluk, states that a license to collect corundum has been granted to a prior applicant and that his application cannot be granted; also states that no further applications from him will be taken into consideration until all the arrears of royalty due by him in respect of his late license in the Bagepalli Taluk are paid up.
6	1870	...	11	Dy. Comr., Kadur ...
				Forwards a copy of the above for his information and calls for a report as to the steps taken for the recovery of the arrears of royalty referred to therein.
8	1871 & 1875	...	11	Messrs. H. Rama Rao, Chintamani, and M. Nan- jundaiya, Kolar
				Enquires what amount of minimum royalty they are prepared to guarantee for a license to collect corundum applied for by them in the Arsikere Taluk.
9	1874	...	11	Mr. Venkatabhatta, Jodi- dar, Hoshalli, Doddballa- pur Taluk
				Enquires what amount of minimum royalty he is prepared to guarantee over and above the Rs. 50 offered by him for a license to collect corundum applied for by him in the Arsikere Taluk.
10	1877	...	11	Liquidator, Mineral Pro- specting Syndicate, Ltd., Madras
				Forwards copy of a report from the Deputy Commissioner, Mysore District, about the cost of filling in excavations made in the course of operations on prospecting blocks Nos. 211 and 213, and requests him to place himself in communication with the Deputy Commissioner in the matter.
11	1878	...	11	Dy. Comr., Mysore ...
				Forwards a copy of the foregoing for his information.
12	1879	...	11	Mr. T. Venkappa, Dodbal- lapur
				States that the license applied for by him to collect corundum in the Koratagere Sub-Taluk cannot be granted as the area has been granted to a prior applicant.
13	1880	...	11	Mr. Aga Mirza Mohamed Husain, Bangalore
				Inform him of the issue of a prospecting license over a block of one square mile of land in the Goribidnur Taluk and states that over the remainder of the taluk a license to collect corundum will be granted to him on his remitting the guaranteed minimum royalty of Rs. 550 offered by him.
14	1886	...	12	Comptroller ...
				Inform him that Mr. C. E. Suryanarayana Rao, Mining Assistant, availed himself of the 2½ months' privilege leave sanctioned to him in

Government Notification Geol. No. 1626, dated 12th March 1912 on the forenoon of 17th January 1912 and returned to duty on the forenoon of 1st April 1912.

Forwards a further sum of Rs. 184-8-0 in payment of charges due on account of survey and demarcation of certain prospecting blocks, done by the staff of his department lent for the purpose.

Returns his prospecting license No. 292 duly renewed for a further period of one year with effect from 8th April 1912.

Cancels the joint application of Messrs. F. Rowlandson and G. H. Bradgate for a prospecting license in the Tarikere Taluk, and directs the refund of the deposit and rent of Rs. 200 paid in respect thereof.

Notifies that Mr. R. Bocquet, Inspector of Mines, handed over and Mr. L. H. Beckwith, Deputy Inspector of Mines, assumed charge of the office of the Inspector of Mines in Mysore on the forenoon of 3rd April 1912.

Forwards a copy of the above for his information.

With reference to his application for a prospecting license over a block of one square mile of land in and around his "property known as Chigarapuram" in the Bowringpet Taluk, states that Government will be prepared to grant him a license over a block of one square mile which includes the said village and that, as he has not sent a map with the boundaries of the block defined, he should accept the boundaries fixed by Government.

Calls for statements of work done on their prospecting blocks during certain quarters of the years 1910, 1911 and 1912.

With reference to his report that excavations made in prospecting block No. 23 have not been filled in by the licensee, calls for information as to the whereabouts of those excavations and enquires whether they are in any area frequented by men or cattle.

With reference to his enquiry about the probable amount of royalty that may likely be due under the leases for certain mining blocks in the Kolar District, states that it is not possible to say what the royalty will be or whether any royalty would be paid at all and suggests that as the transactions in connection with the blocks practically amount to the sale of the blocks the consideration for sale may be taken as the basis for calculating the stamp duty on the leases of the blocks.

Forwards a sketch plan showing the free area of the prospecting block applied for by him in the Honnali Taluk and enquires if he is prepared to take out a license over the available portion.

Returns the extract from his register of licenses and leases inserting therein the information required by him as to the currency or otherwise of the licenses and leases referred to.

Forwards Exploring License No. 40, granted to him for collecting corundum in the Yedahalli village of the Krishnarajpete Taluk.

Forwarding for his information a copy of the above, with a copy of the license issued.

Forwards Exploring License No. 153, granted to him over the whole of the Hassan District.

Forwards for his information, a copy of the above with a copy of the license issued.

Returns his Prospecting License No. 316, duly renewed for a further period of one year with effect from 27th March 1912.

Forwards a copy of the above with the intimation that the rent due for the period of renewal has been received and credited to Government.

Proceedings

OF THE

Government of His Highness the Maharaja of Mysore

MAY 1912.

PART I.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Land Revenue, dated 1st May 1912.*

BEFORE THE GOVERNMENT OF HIS HIGHNESS THE
MAHARAJA OF MYSORE.

APPEAL No. 47 of 1911-12.

Appellant	Vs.	Respondent
Puttanna of Annur village, Gundlupet Taluk.		Linganniah.

Subject.

Appeal against the order of the Deputy Commissioner of the Mysore District declining to allow the appellant to continue to do the shanbhogi duties of the Annur village in the Gundlupet Taluk.

Facts of the case.

1. The villages of Annur and Kodihalli in the Gundlupet Taluk form one firka, and Linganniah, the present respondent before Government, is the baravarddar shanbhog of this firka.

2. In the year 1899-1900, Mr. P. Sreenivasa Rao, the then Sub-Division Officer of Nanjangud, directed on the application of one of the parties concerned that Kodihalli should be registered in the name of Linganniah and Annur in the name of Puttanna, the appellant. Subsequently Puttanna began to look after the duties of Bettahalli village as gumasta. As the two villages under him, *viz.*, Annur and Bettahalli, formed separate firkas, he was directed to give up one of the two villages and a report was also submitted to the Sub-Division Officer, Mr. Vaidyanatha Iyer, stating that Puttanna was incompetent and that he was not doing the duties properly. Thereupon it was ordered that Linganniah, the original baravarddar, should look after the duties of the firka himself.

3. Puttanna then preferred an appeal to the Deputy Commissioner, and that officer dismissed the appeal on the ground that two villages forming separate firkas should not be under one person. Hence the present appeal. This is a case withdrawn from the Revenue Commissioner's file under Section 210A of the Mysore Land Revenue Code. It came on for hearing on the 29th March 1911, when the appellant in person and the respondent represented by Mr. Ramachendra Rao, Advocate, were present and were heard.

Order.

The original arrangement was that the two villages Kodihalli and Annur (which are contiguous) should form only one firka. The Assistant Commissioner who sanctioned the proposal of the Amildar to divide them between the cousins in 1899 was wrong and had no authority to split the firka into two separate charges. The order now passed is correct and so the appeal is dismissed.

No. R. 6152-60—L. B. 461-11-2, DATED BANGALORE, 1ST MAY 1912.

Copy of the above is forwarded to the Deputy Commissioner of the Mysore District together with the records connected with the case and (2) to the Revenue Commissioner in Mysore for information and publication in the *Revenue and Agricultural Gazette*.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Lana Revenue, dated 7th May 1912.*

READ—

Letter No. 12937, dated the 30th June 1911, from the Revenue Commissioner in Mysore, forwarding a copy of his order to the Deputy Commissioner, Mysore District, No. 12986 of the same date, issuing instructions for the reservation of 648 acres and 15 guntas of land out of an area of 918 acres and 3 guntas, known as the Honnabetta hill in the Nagamaugala Taluk, as a revenue reserve or special gomal and requesting that his instructions may be sanctioned.

No. R. 6416-17—L. R. 156-11-2, DATED BANGALORE, 7TH MAY 1912.

ORDER THEREON.—The Revenue Commissioner states that the area proposed to be reserved now forms part of the gomal of three villages, viz., Kunnanakatte Mallenahalli, Sankanahalli and Sriramanahalli, and that the object of the reservation is to prevent sand and stones from the hill, which is steep, being washed down into the Sulekere tank and filling it up, by preserving the vegetation on the top and sides of the hill and also to provide a valuable source of supply of fodder and fuel for the neighbourhood in future by means of a careful conservancy of the resources of the locality with the co-operation of the people. With this view, he has issued instructions to the Deputy Commissioner to the effect that if the villagers agree to provide the necessary agency, etc., the whole area may be maintained as a village forest attached to the village or villages, the inhabitants of which contribute labour and funds for its conservancy, otherwise the whole extent may be divided into convenient lots and allotted to villagers on the lines suggested in the rules circulated with his office memo No. 9353, dated the 18th May 1910, and requests sanction to his recommendation in the matter.

2. The Conservator of Forests who was consulted unofficially is also of opinion that the reservation of the block in question will undoubtedly be of great benefit and that it may be reserved subject to the provisions of Section 35 of the Forest Regulation as there are no rules at present under which forests may be handed over to the people for protection and forest offences dealt with.

3. Government consider that the experiment of securing the co-operation of the people in the conservancy of forests with a view to enable them to realise the importance of providing for their own needs and preventing injury to a work of irrigation which is for their benefit, deserves to be tried, and pending the formation of a general scheme for the constitution of village forests, they are disposed to sanction the Revenue Commissioner's recommendation. Clear instructions should be issued for the guidance of the villagers as to how the area should be protected and watched and what powers should be assigned to the agency which should be responsible for its efficient management. If the voluntary action of the villagers is found to be insufficient for its effectual preservation after a fair trial, the block in question may be treated as a reserved land under Section 35 of the Mysore Forest Regulation. The Revenue Commissioner is requested to report after the end of a year how the arrangements made by him work.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Land Revenue, dated 4th May 1912.*

READ AGAIN—

Government Order No. R 122—L. R. 311-10-2, dated the 5th July 1911, recording Revenue Commissioner's memo No. 9795, dated the 23rd March 1911, forwarding a copy of his communication to the Deputy Commissioner, Chitalding District, authorising him to give promotion to the old class of shekdars according to the old scale of pay so as not to exceed the minimum fixed for that scale for his district.

READ—

Letter No. 2067, dated the 22nd August 1911, from the Revenue Commissioner in Mysore, forwarding for orders with his views, copies of correspondence ending with letter No. 48, dated the 15th July 1911, from the Deputy Commissioner, Mysore District, stating that there are nearly fifty shekdars of the old class in the district, some of whom are young and capable of turning out substantial work and deserving of promotion, and that if they are to be given promotion, under the old scale, simultaneously with the promotion of new shekdars under the new scheme, it will not be possible to keep up to the number fixed for each class under the new scheme in Government Order No. R 2309-21—L. R. 150-06-1, dated the 20th August 1906, and suggesting therefore that until all the old shekdars are fully replaced by new men, the promotion of the old and new shekdars may be regulated without any restriction as to the number in each class, but without exceeding the total number of shekdars and the budget provision.

No. R. 6238-47—L. R. 135-11-2, DATED BANGALORE. 4TH MAY 1912.

ORDER THEREON.—According to the rules relating to the scheme for improving the shekdari service contained in Government Order No. R. 2309-21—L. R. 150-06-1, dated the 20th August 1906, shekdars who are not qualified under the new rules are entitled only to the old rates of pay; and as there is still a large number of such shekdars, who are otherwise quite efficient, it is stated that this restriction has greatly hampered the promotion of deserving men. It is therefore proposed that as it has not been possible to introduce the new scheme fully, discretion may be given to Deputy Commissioners to promote shekdars of the old scale to the maximum rates of pay they would be entitled to under the old rules, *viz.*, Rs. 25 per mensem, provided the limit of 50 per cent of shekdars drawing Rs. 25 per mensem, prescribed under the new rules, is not exceeded by taking the two classes of shekdars, old and new together. Government are not satisfied that this course is free from objection. In the first place, there will be no uniformity in the manner in which promotion is regulated in different districts, and in the second place, it may serve as a serious impediment to the introduction of the revised scheme in full. In order to remove the stagnation complained of, Government consider it sufficient to give discretion to Deputy Commissioners to promote competent shekdars of the old scale from the 3rd to the 2nd class (old scale) after seven years' approved service and from the 2nd to the 1st class after five years' approved service. If they desire higher promotion they should become fully qualified under the new rules.

The Deputy Commissioners of Districts.
The Comptroller to Government.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Land Revenue, dated 7th May 1912.*

READ—

Petition dated the 11th December 1907 from Ramachendriah, agent of the Jodidars of Ardesihalli in the Devanhalli Taluk, representing that the Sirkar raiyats cultivating the bed of the breached Marasandra tank have been unlawfully using the water of the Jodi village tank for the irrigation of their lands and praying that they may be prohibited from doing so.

2. Letter No. 1764, dated the 2nd August 1910, from the Revenue Commissioner in Mysore, submitting for orders the records of the case and stating that according to the Public Works Department the tank was restored by the late Irrigation Department in 1874 at a cost of Rs. 10,000 (of which only Rs. 4,353, the cost of bringing the tank up to the original standard, was contributed by the Jodidars) so that it might irrigate not only the wet lands of the jodi village but also the atchkat and the bed of the breached Government tank of Marasandra, and that the Jodidars, however, deny having agreed to any such arrangement.

3. Correspondence ending with letter No. 9510, dated the 15th November 1910, from the Chief Engineer of Mysore, submitting the papers relating to the restoration of the Jodi Ardesihalli tank by the late Irrigation Department.

No. R. 6413-14—L. R. 68-10-6, DATED BANGALORE, 7TH MAY 1912.

ORDER THEREON.—Government observe that, when the tank was restored in 1874, its capacity was specially increased with the object of irrigating the lands in the Marasandra village and the additional expenditure on that account, which was more than half the outlay on the tank, was borne by Government, and the lands as they were taken up were being irrigated from the jodi tank.

2. Accordingly *Nirasare Patti* of the wet lands of Marasandra village, prepared during the survey operations in 1885-86, shows that the major portion of wet lands with the exception of Survey No. 42 are irrigated by channels drawn from the Jodi Ardesihalli tank. It is also reported that one of the Jodidars is himself a holder of a large extent of lands in the Marasandra village, paying an annual assessment of Rs. 300 and has been irrigating them all along with the water from the Ardesihalli tank. The objection which is now raised related to the irrigation of other new lands which have been taken up in the Marasandra village by the raiyats of some neighbouring villages.

3. Government are of opinion that the right of the Jodidars to object to the supply of water to the lands in the Marasandra village cannot be upheld so long as their title to the first supply from the tank is not interfered with and the quantity of water formerly used by them for irrigating their Jodi lands from the tank is not affected by the supply to other lands. As the capacity of the tank is increased by Government at their own cost, the Jodidars can have no right to levy a water rate for the irrigational facilities provided by Government. They should not also be allowed to interfere with the supply of water to the lands in the Marasandra village which have for the last 37 years enjoyed the right.

4. In order to avoid disputes regarding sufficiency of supply to Jodi and Government lands, the Chief Engineer is requested to put up regulating dams by which the water may be distributed between the two classes of lands according to existing rights, so that each party may be able to obtain the exact supply which the quantity of water in the tank entitles them to.

5. As regards the maintenance of the tank which is intended to supply both the Jodi and Sirkar lands, it is clear that both the Jodidars and the occupants of Government lands are jointly responsible for its maintenance and their liability should be apportioned in accordance with the extent of irrigable lands respectively held by them. The cost of repairs necessitated by the neglect of maintenance and executed by Government in 1904 should be adjusted on the above principle.

C. S. BALASUNDARAM IYER,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore, returning the records of the case.

The Chief Engineer of Mysore, returning File No. 44—I., received from his office.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Land Revenue, dated 8th May 1912.*

READ—

Letter No. 8126, dated the 3rd February 1911, from the Revenue Commissioner in Mysore, suggesting the desirability of making the holder of a private enterprise tank responsible for assessment on all the atchkat lands so that he may keep up the full extent of cultivation thereunder and pay the reduced assessment on the whole *Ayakat*, in addition to his being required to keep the tank at the prescribed standard of safety.

No. R: 6464-73—L. R. 468-10-2, DATED BANGALORE, 8TH MAY 1912.

ORDER THEREON.—The Revenue Commissioner thinks that if the owner of a tank fails to keep it in repair or get the whole atchkat cultivated, mere reduction in the Choutayi or even the withholding of the whole amount will not be a sufficient punishment, but Government should be able to compel him to bring up the tank to a state of full repair and get all the lands cultivated as far as possible, as very often he will be the sole occupant of the reduced *atchkat* under cultivation and may find full compensation in his being able to utilise the whole of the tank water for his land, while Government is the real loser from the diminished atchkat.

2. Government observe that neither in the rules contained in Appendix F to the Land Revenue Rules of 1890, nor in the Rules previously in force under which the repairs of dilapidated Government tanks is permitted, has any condition been introduced by which the person to whom 'permission' is given to restore a tank can be compelled to take up all the lands that can be irrigated from the tank or pay the assessment on all the lands comprised in its atchkat. The only advantages that he is able to derive from the restoration of the tank are, *firstly*, he is entitled to hold the lands that are already in his occupation or which he may have taken up with a view to convert them into wet after restoring the tank at the concession rates and *secondly*, he has the right to receive the rent which has been remitted by Government in his favour in the case of lands in the holding of others but which have been benefited by the restoration of the tank. He is also bound to maintain the tank at the proper standard, and if he fails to do so, the grant is liable to be cancelled, the tank being resumed and dealt with as an ordinary Government irrigation work. Government are, therefore, not in favour of imposing additional obligations on the owner of private enterprise tanks. It is sufficient to make them clearly understand that they will not be allowed to stand in the way of any other persons taking up lands which are not in their holding and that all the lands dependent on the tank should be equally supplied with water.

Exd.—c. v.

Proceedings of the Government of His Highness the Maharaja of Mysore,

**BEFORE THE GOVERNMENT OF HIS HIGHNESS THE
MAHARAJA OF MYSORE.**

APPEAL No. 18 of 1911-12.

Appellant
Linganna son of Mari Gowda,
residing at Haradanhalli,
Nanjangud Taluk.

Vs.

Respondent
Dyave Gowda, son of Dodda
Dyave Gowda in the
same village.

Subject.

Appeal against the order of the Deputy Commissioner, Mysore District, declining to register the pateli of the village in the appellant's name.

Facts of the case.

On 23rd October 1903, one Made Gowda, the elder brother of the appellant, in whose name the pateli in question had been registered as being the eldest 'dauhitra' of the original baravarddar, submitted his resignation to the office, but subsequently represented that his father and brothers did not consent to the hereditary office passing out of the family, and withdrew his resignation and prayed for the grant of one year's leave.

2. One Nanje Gowda was appointed as patel temporarily. On 18th December 1903 he requested to be relieved of his duties and one Kunte Gowda was appointed in his stead. On the latter's death, the respondent urged that he and his father had satisfactorily discharged the patel's duty during the long period between the death of the original hakdar Basave Gowda, and the appointment of his daughter's son Made Gowda and prayed that the vacant office might be registered in his name.

3. On 5th February 1906 the Amildar, Mr. A. Krishnaswami Iyengar, submitted the entire records for the orders of the Assistant Commissioner with the recommendation that the respondent might be appointed as registerdar patel. At the same time, in anticipation of the Assistant Commissioner's orders, the respondent was directed to take charge of the pateli.

4. On 1st February 1909, the Assistant Commissioner returned the records to the Amildar directing that the heirs of the baravarddar Made Gowda should be summoned and their wishes ascertained in the matter of the resignation submitted by the latter.

5. Accordingly the appellant and his brother were examined by the Amildar. They contended that the baravarddar, their brother, got the appointment in his capacity as the eldest 'dauhitra' of the original hakdar and the hereditary office should therefore remain in their family. The Amildar (Mr. S. Dharma Rao), however, recommended that the respondent might be allowed to continue to do the duties as gumasta and the question of registering the pateli in the name of the appellant might be taken up after the death of the respondent. The Assistant Commissioner, Mr. T. K. Sundararajengar, ordered that the appellant be appointed patel on probation for one year.

6. Against this order the respondent appealed to the Deputy Commissioner, who observed that the registerdar having resigned the pateli, the appointment was at the disposal of Government and that there was no necessity to remove the respondent from office only to put in the appellant on probation, and accordingly reversed the Assistant Commissioner's order and directed that the respondent should, as recommended by the Amildar, continue to do the duties, the question of changing the baravard being taken up after the death of the respondent.

7. Against this order the appellant appealed to the Revenue Commissioner. The appeal having been withdrawn under Section 210 A of the Land Revenue Code, came for final hearing on 23rd February 1912, when Mr. L. Sreenivasa Iyengar, Advocate, was heard for the appellant. The respondent was present in person.

Land Revenue, dated 10th May 1912.

Order.

The only argument that the respondent could rely on was that he would not have cared to take up the post if he had not been assured that he would get it permanently. The appointment was, however, bestowed on him only in a temporary capacity.

2. The resignation of the post by one of the brothers especially when objected to by the others, could not deprive the latter of their rights. The Deputy Commissioner's order will therefore be reversed and the appellant will be appointed as the patel of the village.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Land Revenue, dated 17th May 1912.*

READ—

The following precis of papers on the subject of concessions to applicants for waste lands in bechirak villages in the Heggaddevankote and Hunsur Taluks :—

P R E C I S .

In the Representative Assembly of 1909, Mr. Lingegowda of the Mysore District Board and Mr. H. C. Subba Rao of the Hunsur Taluk suggested that Government waste dry lands in bechirak villages, especially in the Heggaddevankote and Hunsur Taluks, might be given out for cultivation on shraya tenure, the kandayem being fixed at two annas per acre for the first fifteen years and thereafter raised to the full assessment gradually. They also represented that applications for lands in these localities were not speedily disposed of and, as an instance of delay, referred to an application for lands at Waderahalli, Hosahalli hobli, Hunsur Taluk, which had been pending for over two years.

2. The matter was referred to the Revenue Commissioner in Mysore for enquiry and report.

3. The Assistant Commissioner in charge of the Mysore Sub-Division reported (in his letter No. 76, dated 26th November 1910, to the Deputy Commissioner, Mysore District) that the delay in the disposal of the Waderahalli darkhast was due to the fact that the land applied for in the first instance was not taken up but another land was applied for and granted instead in the same year. He was of opinion that the concessions prayed for by the members should be shown only to applicants for unassessed waste lands and such assessed waste lands as were overgrown with bushes, in thinly populated areas in Heggaddevankote and Hunsur Taluks, such as, Kandalike and Antarsante hoblis of the Heggaddevankote Taluk and Haramahalli of the Hunsur Taluk, where lands were being freely resigned. He further observed that the population of the Kandalike and Antarsante hoblis was slowly decreasing on account of increase of malaria due to the recent afforestation of large areas. The Deputy Commissioner, Mysore District, concurred in the opinion. The Revenue Commissioner stated that he was trying to secure the speedy disposal of darkhast generally, so as to promote the expansion of cultivation without sacrificing Government interests, and that he would take the necessary steps to remedy the difficulties after personally discussing the subject with the members concerned.

4. The correspondence was recorded in the Government Order No. 77, dated 7th July 1911, and the attention of the Conservator of Forests was drawn to the observations of the Mysore Sub-Division Officer and the Deputy Commissioner regarding the decrease of population in the Kandalike and Antarsante hoblis and he was requested to favour Government with his remarks thereon.

5. In his letter No. 743, dated 25th July 1911, the Conservator reports that the allegation that the population of the two hoblis in question is decreasing owing to excessive reservation, is groundless, for there has been no reservation of new areas in the Kandalike hobli and that only a small area far away from village limits has been reserved in the Antarsante hobli. He adds that State Forests provide employment for hundreds of people and in this sense afforestation cannot be said to be the cause of decrease in population, and that the nature of the localities which are wild, thickly wooded and waterless, must be regarded as the cause of the depopulation.

No. R. 6745-6—L. R. 408-09-6, DATED BANGALORE, 17TH MAY 1912.

ORDER THEREON.—Recorded.

To—The Revenue Commissioner in Mysore.
The Conservator of Forests in Mysore.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Land Revenue, dated 8th—21st May 1912.*

READ—

Letter No. 4560, dated the 6th November 1911, from the Revenue Commissioner in Mysore, forwarding for orders of Government copy of letter No. 282, dated the 2nd November 1911, from the Deputy Commissioner, Shimoga District, intimating the despatch of a gold nugget which was discovered by a Lambani on the margin of a halla in Survey No. 16 of the Palavanahalli village, Honnali Taluk, and proposing certain temporary measures for regulating the practice of gold-washing by Jalagars, which is carried on over a large area in the locality, so that there may be no surreptitiousness about the profession which makes the Jalagar feel like a thief and places him at the mercy of the Sahukar to whom he sells his gold.

No. R. 7051-601—L. R. 252-11-2, DATED BANGALORE, 8TH—21ST MAY 1912.

ORDER THEREON.—The gold-washing industry as practised by Jalagars is a decaying one and of little practical importance. The Jalagars are few in number and the result of their work is probably trifling. They work intermittently, generally after the rains, and for the rest of the year they follow other occupations.

2. Though the Government have permitted the people to wash for gold for a long time past without let or hindrance, no Jalagar has any right over any tract of land and the sovereign right to minerals, including alluvial gold, rests with the State. Government need not forego its right to collect minerals or to grant exclusive licenses to do so under the mining rules, merely because it has not considered it necessary to interfere with the custom of washing practised by Jalagars.

3. Under these circumstances, Government consider that there is no need to frame any set of rules or to recognise the profession or rights of a Jalagar. The Government reserve their full rights to grant licenses under the mining rules whenever and wherever it is found that alluvial gold exists in paying quantities.

READ—

The Administration Report of the Revenue Department for the year 1910-11, received with the Revenue Commissioner's letter No. C. 15, dated the 30th September 1911.

No. R. 7282-92—L. R. 230-11-3, DATED BANGALORE, 28TH MAY 1912.

ORDER THEREON.—During the year under review, Rajakaryapravina Rao Bahadur Mr. A. Ranagaswami Iyengar, B.A., B.L., continued in office as Revenue Commissioner and retired with effect

Para 3 of the Report. from the 1st July 1911. Government have, in a separate order, placed on record their appreciation of the services rendered by that officer in various capacities including his administration of the Revenue Department.

2. Owing to the punctual submission of almost all the district reports, the Revenue Commissioner was able to submit his report in time. The reports of Assistant Commissioners are stated not to have shown much improvement. Government think it unnecessary to prescribe any formal review of these reports by the Revenue Commissioner, but they consider that much improvement will result if the Revenue Commissioner and the Deputy Commissioners scrutinize the reports of the Assistant Commissioners in a critical manner and communicate to them their remarks and suggestions.

3. The year under report was, on the whole, a favourable one. The rainfall was everywhere copious and above the average, having exceeded the average of the previous year by 10·27 inches or by 26·8 per cent and that of the past 31 years by 10·10 inches or by 26·3 per cent. The north-east monsoon was generally excessive and injured the crops considerably, and the outturn did not therefore come up to the expectations raised by the propitious rains of the earlier part of the year. The average yield of the two principal crops, paddy and ragi, was 10·2 and 9·5 annas, respectively, against 11·6 and 9·6 annas during the year 1909-10. Prices which had risen greatly after the severe drought of the year 1908-09 and had fallen in 1909-10 fell still more during the year. A fair outturn combined with moderate prices greatly promoted the prosperity of all classes. The wages of unskilled labour, upon which the majority of the population depend, being chiefly regulated by custom in the interior, remained unaffected. The agricultural classes, having had two successive years of a more or less favourable character, were able to recover fully from the effects of the previous drought. The land revenue including the arrears of previous years was collected without difficulty and takavi advances were also paid back. The number of transfers of lands from agriculturists to non-agriculturists was less than in the previous year by 131. The raiyats also showed greater unwillingness to receive takavi advances and add to their liabilities. There were no serious outbreaks of epidemic diseases among cattle. The improvement in seasonal conditions reacted beneficially on trades and industries.

4. Both the area cropped and the area occupied showed an increase. The net increase in the occupied area, after deducting the area of lands resigned, was 61,641 acres and the net increase in the assessment was Rs. 64,281. As compared with the previous year, there was some decrease in the extent of new lands taken up and an increase in the number relinquished, but this difference seems to be due to the exceptional circumstances of the previous year. The total area under crops was more than that of the previous year by 95,963 acres, of which more than 26,000 acres were in the Chitaldrug District. The increase was noticeable in all the districts except Shimoga, which, however, showed a decrease of only 3,190 acres as compared with the decrease of 31,500 acres in the previous year.

5. The net recoverable demand for the year was only Rs. 1,22,29,014 on account of land revenue and Rs. 3,81,702 on account of mohatarfa. The amounts collected were Rs. 106,31,822 and Rs. 2,96,256 respectively, or 86·93 and 77·58 per cent of the demand. Under land revenue 91·5 per cent of the current demand and 60·8

Proceedings of the Government of His Highness the Maharaja of Mysore,

per cent of the arrears were collected. Though, on the whole, the collections were better than in the previous year, especially in the Shimoga, Hassan, Kadur and Mysore Districts, yet considering the general improvement in the position of agriculturists in consequence of the good harvests, the collections cannot be said to be satisfactory. It behoves the Deputy Commissioners to pay particular attention to this subject.

6. The number of coercive processes of all kinds issued for the recovery of land revenue was more than in the previous year by 1,515, but the number of cases in which sales were actually held was only 1,469 against 1,759 in the previous year and the amount recovered by this means was Rs. 4,143. The total recoveries by coercive processes amounted to Rs. 16,03,123 or 15 per cent of the total collections. Of this sum, more than $\frac{3}{4}$ ths was realised by the mere issue of notices of demand, which in the majority of cases were found to have been necessary owing to the tendency of some of the raiyats to put off payment except under pressure, even in good years.

7. Government do not consider it satisfactory that there should have been so much delay generally in the submission of the periodical revenue and treasury accounts. Government will be glad if the Revenue Commissioner will investigate the question of simplifying the returns and the preparation of a manual of revenue accounts. The inspection of District and Taluk Treasuries was also not fully carried out in accordance

Chikmagalur. Jagalur.
Mudgere. Hosdurga.
Challakere.
Davangere.

with standing orders. Government regret to note that the Bangalore District Treasury and the marginally noted Taluk Treasuries were not inspected at all during the past year.

8. There was not much improvement in the dates of commencement and completion of Jamabandi work during the year, though in the Mysore District it was completed before the collection season. The explanation of the Deputy Commissioner of Hassan for not having sent any Jamabandi reports for two years in succession should be called for by the Revenue Commissioner and forwarded to Government.

9. The number of darkhasts for land received during the year was 13,489 and was less than that of the previous year by 2,642. The fall is noticeable in all the districts except Chitaldrug where there was an increase of about 200. Including the number pending at the beginning of the year (8,840), the total number for disposal was 22,335. The number actually disposed of was 13,489 as against 16,600 in the previous year or 61 per cent as against 66 per cent. The arrears were somewhat reduced in the Kolar District but they now show an increase in all the districts. Unless Sub-Division Officers and Deputy Commissioners analyse and explain the reasons for which darkhasts are pending, it will not be possible to say that the delay is unavoidable. Rules have now been issued for the grant of assessed lands for *eksal* cultivation. The number of cases requiring elaborate investigation is thus greatly reduced, and there should be no difficulty in disposing of the majority of darkhasts within a month after receipt.

10. It is stated that the demand for land improvement and other takavi advances is considerable only when the seasonal conditions are bad, and that, during the year, there was a great fall in the number of applications and even that some of the pending applications were withdrawn. Government agree with the observations of the Revenue Commissioner in para 40 of the report and commend them to the serious attention of District Officers. Out of Rs. 1,25,000 provided for takavi advances for land improvement, only Rs. 41,500 was actually disbursed, about three-fourths of the amount having been given in the Tumkur and Kolar Districts. Out of a total amount of Rs. 2,02,793 that was due from the raiyats in respect of advances granted during the previous year Rs. 1,39,196 or about 69 per cent was actually

Land Revenue, dated 28th May 1912.

recovered. Both in the grant of advances and collecting previous advances it has to be observed with regret that, on the whole, district officers did not evince sufficient interest.

11 The inspection of major and minor tanks by the Deputy Commissioners and their assistants except in the Districts of Mysore and Shimoga was not sufficient. The number of major and minor tanks repaired or restored during the year was 358 and 477 as against 335 and 470, respectively, in the previous year. There was thus a slight increase in the number of tanks dealt with by Government agency, but the amount actually spent thereon showed a fall. The amount spent on the restoration of major and minor tanks was Rs. 2,16,803 and Rs. 83,769 as against Rs. 2,64,133 and Rs. 1,02,421, respectively, in the previous year. The value of the earthwork done by raiyats in respect of major and minor tanks was Rs. 39,884 and Rs. 78,819 as against Rs. 31,133 and Rs. 70,650 in the previous year. The steady increase in the value of earthwork done by raiyats indicates that the raiyats are fully alive to the importance of the restoration and maintenance of tanks and this interest should be fully reciprocated by readiness on the part of local officers to help the completion of such works by fully utilizing the funds placed at their disposal for the purpose. Government are glad to observe that endeavours are being made to facilitate the enforcement of liability of individual raiyats for maintenance of tanks by fixing stones on tank bunds to define the share of work to be done by each raiyat or a group of raiyats, and this has been completed in the Taluks of Kadur, Tarikere and Chikmagalur in the Kadur District.

12. The systematic inspection of boundary marks is still very much neglected and the Revenue Commissioner is requested to submit separate proposals for revising rules if such revision is necessary. The condition of the frontier boundary marks is reported to be good in the Districts of Bangalore, Kolar, Mysore and Hassan. Inspection seems to have been defective in the Shimoga and Kadur Districts.

13. In the Mysore, Hassan and Shimoga Districts, the improvement of village communications received a fair amount of attention. In the Mysore District, it is stated that 77 miles of new roads were opened, of which, 50 miles were in the Heggaddevankote Taluk. In the Hassan District about 70 miles of road were newly opened and 206 miles of old road repaired.

14. Avenue trees are reported to be in good condition and the filling of gaps and vacancies to be attended to by the village officials.

15. The number of persons vaccinated during the year was 71,184 as against 97,800 in the previous year and there is thus a decrease of 26,616 or more than 25 per cent. All the districts have shared in the decrease except Kadur, which showed a slight increase of 408 over the number for the previous year. The decrease was most marked in the Kolar and Bangalore Districts and the explanation offered is that, as Amildars have no control over vaccinators, the latter are most inattentive to their duties and are unable to arouse the confidence of the villagers. The remarks in para 62 of the Report are commended to the attention of the Sanitary Commissioner.

16. The Revenue Commissioner reports that there has been a general improvement in the work of village officers and also of taluk and district establishments. The subject of revising the District Office establishments is engaging the attention of Government. The necessity for the revision of pay of the lowest appointments in Taluk Offices and the difficulty of securing suitable men under the present system brought to notice have been noted.

17. The inspection done both by Deputy Commissioners and by Sub-Divisional Officers has, on the whole, been unsatisfactory. The reason assigned is that owing to arrangements connected with Census, there was not much time for inspection. The Deputy Commissioners

Proceedings of the Government of His Highness the Maharaja of Mysore,

per cent of the arrears were collected. Though, on the whole, the collections were better than in the previous year, especially in the Shimoga, Hassan, Kadur and Mysore Districts, yet considering the general improvement in the position of agriculturists in consequence of the good harvests, the collections cannot be said to be satisfactory. It behoves the Deputy Commissioners to pay particular attention to this subject.

6. The number of coercive processes of all kinds issued for the recovery of

Para 32 of the Report.

land revenue was more than in the previous year by 1,515, but the number of cases in which sales were actually held was only 1,469 against 1,759 in the previous year and the amount recovered by this means was Rs. 4,143. The total recoveries by coercive processes amounted to Rs. 16,03,123 or 15 per cent of the total collections. Of this sum, more than $\frac{1}{4}$ th was realised by the mere issue of notices of demand, which in the majority of cases were found to have been necessary owing to the tendency of some of the raiyats to put off payment except under pressure, even in good years.

7. Government do not consider it satisfactory that there should have been

Para 31 of the Report.

so much delay generally in the submission of the periodical revenue and treasury accounts. Government will be glad if the Revenue Commissioner will investigate the question of simplifying the returns and the preparation of a manual of revenue accounts. The inspection of District and Taluk Treasuries was also not fully carried out in accordance

Chikmagalur. Jagalur.
Mudgere. Hosdurga.
Challakere.
Davangere.

with standing orders. Government regret to note that the Bangalore District Treasury and the marginally noted Taluk Treasuries were not inspected at all during the past year.

8. There was not much improvement in the dates of commencement and

Para 21 of the Report.

completion of Janabandi work during the year, though in the Mysore District it was completed before the collection season. The explanation of the Deputy Commissioner of Hassan for not having sent any Janabandi reports for two years in succession should be called for by the Revenue Commissioner and forwarded to Government.

9. The number of darkhasts for land received during the year was 13,489 and

Para 52 of the Report.

was less than that of the previous year by 2,642. The fall is noticeable in all the districts except Chitaldrug where there was an increase of about 200. Including the number pending at the beginning of the year (8,840), the total number for disposal was 22,335. The number actually disposed of was 13,489 as against 16,600 in the previous year or 61 per cent as against 66 per cent. The arrears were somewhat reduced in the Kolar District but they now show an increase in all the districts. Unless Sub-Division Officers and Deputy Commissioners analyse and explain the reasons for which darkhasts are pending, it will not be possible to say that the delay is unavoidable. Rules have now been issued for the grant of assessed lands for *eksal* cultivation. The number of cases requiring elaborate investigation is thus greatly reduced, and there should be no difficulty in disposing of the majority of darkhasts within a month after receipt.

10. It is stated that the demand for land improvement and other takavi

Para 36 of the Report.

advances is considerable only when the seasonal conditions are bad, and that, during the year, there was a great fall in the number of applications and even that some of the pending applications were withdrawn. Government agree with the observations of the Revenue Commissioner in para 40 of the report and commend them to the serious attention of District Officers. Out of Rs. 1,25,000 provided for takavi advances for land improvement, only Rs. 41,500 was actually disbursed, about three-fourths of the amount having been given in the Tumkur and Kolar Districts. Out of a total amount of Rs. 2,02,793 that was due from the raiyats in respect of advances granted during the previous year Rs. 1,39,196 or about 69 per cent was actually

Land Revenue, dated 28th May 1912.

recovered. Both in the grant of advances and collecting previous advances it has to be observed with regret that, on the whole, district officers did not evince sufficient interest.

11. The inspection of major and minor tanks by the Deputy Commissioners and their assistants except in the Districts of Mysore and Shimoga was not sufficient. The number of major and minor tanks repaired or restored during the year was 358 and 477 as against 335 and 470, respectively, in the previous year. There was thus a slight increase in the number of tanks dealt with by Government agency, but the amount actually spent thereon showed a fall. The amount spent on the restoration of major and minor tanks was Rs. 2,16,803 and Rs. 83,769 as against Rs. 2,64,133 and Rs. 1,02,421, respectively, in the previous year. The value of the earthwork done by raiyats in respect of major and minor tanks was Rs. 39,884 and Rs. 78,819 as against Rs. 31,133 and Rs. 70,650 in the previous year. The steady increase in the value of earthwork done by raiyats indicates that the raiyats are fully alive to the importance of the restoration and maintenance of tanks and this interest should be fully reciprocated by readiness on the part of local officers to help the completion of such works by fully utilizing the funds placed at their disposal for the purpose. Government are glad to observe that endeavours are being made to facilitate the enforcement of liability of individual raiyats for maintenance of tanks by fixing stones on tank bunds to define the share of work to be done by each raiyat or a group of raiyats, and this has been completed in the Taluks of Kadur, Tarikere and Chikmagalur in the Kadur District.

12. The systematic inspection of boundary marks is still very much neglected and the Revenue Commissioner is requested to submit separate proposals for revising rules if such revision is necessary. The condition of the frontier boundary marks is reported to be good in the Districts of Bangalore, Kolar, Mysore and Hassan. Inspection seems to have been defective in the Shimoga and Kadur Districts.

13. In the Mysore, Hassan and Shimoga Districts, the improvement of village communications received a fair amount of attention. In the Mysore District, it is stated that 77 miles of new roads were opened, of which, 50 miles were in the Heggaddevankote Taluk. In the Hassan District about 70 miles of road were newly opened and 206 miles of old road repaired.

14. Avenue trees are reported to be in good condition and the filling of gaps and vacancies to be attended to by the village officials.

15. The number of persons vaccinated during the year was 71,184 as against 97,800 in the previous year and there is thus a decrease of 26,616 or more than 25 per cent. All the districts have shared in the decrease except Kadur, which showed a slight increase of 408 over the number for the previous year. The decrease was most marked in the Kolār and Bangalore Districts and the explanation offered is that, as Amildars have no control over vaccinators, the latter are most inattentive to their duties and are unable to arouse the confidence of the villagers. The remarks in para 62 of the Report are commended to the attention of the Sanitary Commissioner.

16. The Revenue Commissioner reports that there has been a general improvement in the work of village officers and also of taluk and district establishments. The subject of revising the District Office establishments is engaging the attention of Government. The necessity for the revision of pay of the lowest appointments in Taluk Offices and the difficulty of securing suitable men under the present system brought to notice have been noted.

17. The inspection done both by Deputy Commissioners and by Sub-Divisional Officers has, on the whole, been unsatisfactory. The reason assigned is that owing to arrangements connected with Census, there was not much time for inspection. The Deputy Commissioners

Proceedings of the Government of His Highness the Maharaja of Mysore.

of Bangalore, Tumkur and Hassan have not camped out even for the minimum number of days prescribed under Government Orders, for which no explanation is offered. This is very much regretted as Government expect better compliance with rules from Deputy Commissioners.

18. None of the Assistant Commissioners have camped out for the minimum number of days prescribed for their itineration. The Sub-Division Officer of Davangere has camped out the largest number of days, *viz.*, 197, and in a large number of Sub-Divisions, even the period of itineration prescribed for Deputy Commissioners has not been reached. It is also stated that most of the places inspected were on the roadside. Government consider it very necessary to insist that each Sub-Division Officer should carry out fully the itineration prescribed for him and traverse the whole of his charge at least once a year. If the period of itineration now prescribed is too high, the Revenue Commissioner, as already directed, should submit proposals regarding its reduction, but, when a minimum has been prescribed, Government consider that each Sub-Division Officer should be compelled to keep to it except for adequate reasons, which should be explained to the Revenue Commissioner each quarter and accepted by him as sufficient.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

The following letter No. 10142, dated the 5th March 1912, from the Revenue Commissioner in Mysore, submitting the Comptroller's review on the working of the Treasuries in the State during the year 1910-11:—

"I have the honor to forward herewith letter No. T. A. D. 779, dated the 12th January 1912, (and its enclosures) from the Officiating Comptroller to the Government of His Highness the Maharaja of Mysore, reporting on the working of the Treasuries in the State, during the year 1910-11, and to state as follows:—

2. The Officiating Comptroller's review and the statements appended to it show that the District Treasuries of Bangalore, Kolar, Tumkur and Chitaldrug delayed too long the submission of the various returns and accounts due to the Comptroller's Office, and that some of the accounts furnished by these Treasuries were not complete. But it is evident, on the whole, that an earnest attempt was made in all the Treasuries to submit the accounts more promptly than in previous years, and to adhere to the codal rules and circular orders of the Account Department.

3. As regards the delay in the submission of vouchers in support of potgi disbursements, referred to in para 7 of the Comptroller's letter, the Deputy Commissioners of Districts concerned will be addressed, with a view to ascertain the reasons for the chronic delay in the submission of these vouchers in particular.

4. There is no need to refer here, at length, to the work done by Revenue officers in this connection by way of inspection, as a short account of the same has been furnished in the Revenue Administration Report for the year 1910-11 (*vide* para 51)."

ENCLOSURE.

Letter No. T. A. D. 779, dated the 12th January 1912, from the Officiating Comptroller, to the Revenue Commissioner in Mysore:—

"I have the honor to forward herewith my review on the working of the Treasuries in the State for the year ending 30th June 1911, with the statements usually appended to it, for being submitted to Government with your report.

LISTS OF PAYMENTS AND CASH ACCOUNTS.

Statement A, column 3, Statement B, column 3, Statement C.—Hassan is the only district which sent these returns punctually on the due dates and it is noteworthy that in this respect it not only maintained the position it held in the previous year in regard to the second list of payments and the cash account, but submitted the first list also practically in time. Shimoga, Chitaldrug and Mysore sent these returns somewhat earlier than in the previous year, but these districts have to make further attempt for the submission of their accounts within the appointed dates, particularly in the case of the first list of payments. Kolar and Tumkur made little or no attempt to minimize the delay and Kadur and Bangalore showed retrogression; the delay in the submission of the first list of payments by the former varied from 6 to as many as 25 days and the average number of days of delay by the latter in the submission of second list of payments and cash account increased respectively from 2 to 5 in 1909-10 to 4 and 6 in the year under report.

3. It should be possible to send these lists and accounts on the prescribed dates and personal attention on the part of the Treasury Officer is certain to produce a perceptible improvement in the punctual submission of returns. In the Mysore District there has been a steady improvement as will be seen from the figures given below, apparently due to the attention the work has received at the hands of the Treasury Officer:—

	Average delay in			
	1907-08	1908-09	1909-10	1910-11
First list of payments	21 days	17 days	9 days	5 days
Second "	15 "	10 "	5 "	3 "
Cash Account	12 "	6 "	4 "	2 "

4. The fact that there was only one officer presiding over this Treasury throughout the year under report has also no doubt contributed to the improvement. The improvement in

Proceedings of the Government of His Highness the Maharaja of Mysore,

Hassan, as pointed out in the previous reports, is also due to the same cause. Kolar, Tumkur and Kadur are comparatively minor districts and there is no excuse for the long delays in the submission of accounts for which they are now responsible. Bangalore is also behind Mysore in point of punctuality.

5. *Vouchers and subsidiary statements: Statements A and B, columns 4 (a) and (b).*—Judging from the number of schedules which were not received with the cash accounts, Shimoga is the only district which may be said to have complied with the rule requiring the submission of these returns along with the cash accounts, and the cash accounts themselves, as observed above, were also sent fairly punctually by this Treasury. Though the number of belated schedules in Mysore was more than in any other district, it was much less than in the previous year, showing that an attempt at improvement was made in this direction also. Excepting Kadur, which also showed some improvement in this respect, the remaining districts, namely, Bangalore, Kolar, Tumkur, Chitaldrug and Hassan, continued to submit their accounts in as incomplete a condition as ever.

6. The minor statements such as those of Amrut Mahal receipts, stamps, fees, fines, police receipts, etc., were generally sent a week or ten days after the despatch of the cash accounts, while there was a delay of from two weeks to a month in the submission of the larger returns such as deposits, house-building advances, etc. The inconvenience resulting from the belated submission of returns and vouchers is obvious and whatever defect in the method of work of Treasuries is now responsible for the protracted delays that occur in the despatch of schedules and vouchers should immediately be remedied.

7. As usual, a list showing the vouchers which should have been sent with the bi-monthly lists of payments, but which have not been received in this office up to date, is also appended to this report (Statement G). As pointed out last year, most of these consist of *potgi* bills and it requires investigation why there is such inordinate delay in the submission of these vouchers.

8. *Annual returns: Statement D.*—No District Treasury sent these returns on the due dates. There was a delay of about three weeks in Kolar, Mysore and Hassan, four weeks in Chitaldrug, six weeks in Tumkur, seven weeks in Bangalore and Kadur, and more than eleven weeks in Shimoga. The delay in the submission of the annual returns of Savings Banks Accounts will be noticed in the report on working of the Savings Banks in the State to be submitted to Government.

9. *Objection statements: Statement E.*—The statements for the earlier months of the year were returned late by some of the Treasuries, but every Treasury endeavoured to minimize delay in attending to those of the later months.

10. *Items objected to: Miscellaneous (Statements A and B, columns 5 to 8).*—The defects and omissions noticed during the examination of the lists of payments and cash accounts and the audit of paid bills, are detailed in Statement A.

The following deserve special notice:—

(1) The Treasuries are required to submit for approval of this office, corrections, if any, to be made in the cash account of a month for embodying them in the accounts for the month under preparation in the Treasury, the adjustments on account of corrections in the cash accounts for the month of June only being made by this office. The Chitaldrug and Tumkur District Treasuries proposed a large number of corrections after the accounts for June were despatched, most of which pertained to the earlier months and should have been embodied in the Cash Accounts of the subsequent months.

(2) Some alterations in the accounts for June were not proposed by the 30th September, agreeably to circular instructions issued by this office, by the following Treasuries:—

1. Kolar,
2. Bangalore and
3. Chitaldrug.

(3) The Railway Police Inspector at Mysore went on privilege leave and drew his leave allowance for two months in advance from the Mysore Taluk Treasury. After availing himself of only a portion of the leave he returned to duty; and in the ordinary course presented a bill, claiming pay for two months, after deducting $\frac{1}{2}$ of the advance, though he was not entitled to such pay and this bill was paid by the Taluk Treasury. The Treasury Officer was asked to explain this irregularity and instructed not to disburse the Inspector's pay for the next two months with a view to have the advance already drawn adjusted. Not only did the Sub-Treasury Officer not furnish the explanation required but also disbursed the pay of the Inspector. Thereupon the matter was reported to the Deputy Commissioner. He has reported in his No 3676, dated the 14th December 1911, that he has communicated his displeasure to the Amildar and let off the Shoristadar with a warning on account of his

Land Revenue, dated 29th May 1912.

inexperience of Treasury work, and that he will award a suitable punishment with a transfer to the Nagadi Gunista who was responsible for this irregularity. The overpayment has been adjusted.

11. *Concluding remarks.*—The improvement noticed in the last year's report was fairly maintained in the year under review.

The District Treasury Manual, the issue of which has been sanctioned by Government in their Order No. F1. 436—G. F. 106-05-7, dated the 31st July 1911, and the third Edition of the Taluk Treasury Manual, which has been completely revised, are in the Press.

No. R. 7325-34—L. R. 395-11-2, DATED BANGALORE, 29TH MAY 1912.

ORDER THEREON.—Recorded. As pointed out by the Officiating Revenue Commissioner, there has been improvement in Treasury work generally and there is room for more improvement.

Proceedings of the Government of His Highness the Maharaja of Mysore,

BEFORE THE GOVERNMENT OF HIS HIGHNESS THE
MAHARAJA OF MYSORE.

Appeal No. 67 of 1911-12.

Appellant—M. K. Srinivasiengar of Malur in the Channapatna Taluk.

Subject.

Appeal against the order of the Revenue Commissioner in Mysore, rejecting the petitioner's prayer for the removal of the irrigation cess on his inam lands in the Malur village of the Channapatna Taluk.

Facts of the case.

At the time of Survey Settlement in 1893-94, the inam lands, bearing Survey Nos. 863 to 866 and 871 to 880, belonging to the appellant and his uncle, were charged with irrigation cess on the ground that water from private pits temporarily dug was being used for watering the cocoanut plants.

2. On the representation of the petitioner, the Deputy Commissioner, Mr. H. H. Sparkes, in his letter No. 222, dated the 12th September 1906, to the Revenue Commissioner, recommended the removal of the cess in question and the matter was referred to Colonel Grant for his opinion.

3. In reply he stated, in his letter No. 431, dated the 2nd December 1906, that the lands referred to above could not be considered as Khushki Bagayet as the wells or pits from which they derived irrigation benefited greatly from tanks and the stream adjoining, and that he himself assessed them as decidedly benefiting from their position with reference to tanks.

4. He further stated that the present case did not fall under Government Proceedings No. 11251-9—R. 3738, dated the 23rd June 1897.

5. Thereupon the Revenue Commissioner, Mr. Rangaswami Iyengar, declined to remit the irrigation cess.

6. The petitioner having submitted an application for reconsideration of the above order, the party represented by Mr. C. Seshachar, Advocate, was heard by the Revenue Commissioner on the 30th May 1907.

7. At the time of hearing, the petitioner's Advocate produced before the Revenue Commissioner (1) a copy of the "Excess Tarav Patrika" and (2) a copy of "Nirasraya Patrika," and argued that the lands in question were classed as Khushki Bagayet in the "Excess Tarav Patrika" that they were not dependent upon tank water; and that in the "Excess Tarav Patrika" there were two letters ಖು.ಬಾ in column 8, which meant Khushki Bagayet; but the Revenue Commissioner dismissed the petition on the ground that the interpretation was incorrect and that the entry properly should have been Krishnaraj-khandi and that it was somehow abbreviated into ಖು.ಬಾ.

8. Hence the present appeal to Government.

9. The case came on for hearing on the 16th April 1912, when the appellant, who was present, was heard.

Order.

In the Revenue Commissioner's order dated the 2nd September 1907, the words ಖು.ಬಾ (ಖುಷ್ಕಿ ಬಾಗಾಯತ) are explained away by saying that they may be a mistake for Krishnaraj-khandi. This is a very doubtful explanation, as ಖು or ಖುಷ್ಕಿ could be more reasonably be interpreted as referring to the extent of the Bijavari (ಖುಷ್ಕಿಬಂಡಿ being 64,000 square yards where ಕುಖಂಡಿ would be 10,000). The irrigation cess should be according to Government Order levied on wet lands; and the only reasonable definition of wet lands should be those that are irrigated regularly.

Land Revenue, dated 29th May 1912.

There is nothing in the records to show that these lands are so irrigated at all. Even if they are, it is admittedly only from wells within the garden. The allegation that these wells draw water from percolation underground from streams or tanks outside cannot make the wells other than private wells within the purview of the order of 1907. The only exception made refers to wells within the area commanded by particular tanks.

The order of the Revenue Commissioner should be reversed and the irrigation cess in dispute remitted.

No. R. 7335-43—L. R. 282-07-4, DATED BANGALORE, 29TH MAY 1912.

Copy of the above is forwarded to the Revenue Commissioner in Mysore, together with the records received with his letter No. 7541, dated the 28th January 1912, with the request that the decision may be caused to be published in the *Revenue and Agricultural Gazette*.

Government Order No. R. 4404-5—Agri. 38-07-5, dated 18th January 1908, appointing Dr. L. C. Coleman as Mycologist and Entomologist to the Government of His Highness the Maharaja of Mysore for a period of five years with effect from the 7th January 1908.

No. R. 6294-335—AGRI. 52-11-2, DATED BANGALORE, 4TH MAY 1912.

ORDER THEREON.—The term of five years for which Dr. Leslie Coleman was appointed as Mycologist and Entomologist expires on the 7th of January 1913. The Government of His Highness the Maharaja have resolved to appoint him from that date as Director of Agriculture on an enhanced pay of Rs. 1,200 rising to Rs. 1,400 by annual increments of Rs. 50. He will be regarded as being in the permanent service of Government from the date of his first appointment as Mycologist and Entomologist, and will be subject to the Mysore Service Regulations in all respects.

2. The allowance of Rs. 75 sanctioned to him for being in charge of the Agricultural Chemist's Office will cease from the 7th January 1913.

3. His Highness is confident that as Head of the Agricultural Department, Dr. Coleman will be able to organize the Agricultural Department of the State and its work in a practical and comprehensive manner. It will also be an important part of his duties to establish an Agricultural School or College and to devise a scheme for general Agricultural education in the State.

4. Dr. Coleman is requested to draw up a programme of work to be carried out during the next five years in all the branches of the Department, together with approximate estimates of expenditure, and submit it for the approval of Government.

Exd.—c. v.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Correspondence ending with letter No. 838, dated 16th March 1911, from Dr. Coleman, Officer in charge of the Agricultural Chemist's Office, submitting proposals for opening an Agricultural School at Bangalore, the following being a summary of the scheme:—

1. *Entrance qualifications.*—As the School will be intended primarily to train sons of landholders to work their own land and not to train men for Government service, candidates who have studied between the Matriculation and Lower Secondary standards and possess a fairly good knowledge of English may be admitted.

2. *Course.*—For the present a two years' course would be sufficient, the subjects taught being distributed as follow:—

1ST YEAR.

(1) *Practical Agriculture.*—Actual agricultural operations to be carried out by the students on the Farm throughout the year.

(2) *Elements of Agriculture.*—Elementary lectures to be given during the 2nd term.

(3) *Elementary Chemistry.*—Practical and theoretical—dealing with (a) the common elements especially those that enter into the composition of plants and animal tissue, (b) organic and inorganic compounds.

(4) *Botany.*—Elementary study of plant forms leading up to Economic Botany and Mycology.

(5) *Zoology.*—Elementary study of animal forms leading up to Entomology and Veterinary Science.

2ND YEAR.

(1) *Practical Agriculture.*—Each student to manage a plot of land, perform all operations of preparing soil, sowing, cultivation and harvesting; record of operations, expenses and profits to be kept.

(2) *Theoretical Agriculture.*—Cultivation of crops with a special reference to those grown in Mysore.

(3) *Economic Botany.*—Study of the chief economic plants of the State, elements of plant-breeding, theoretical and practical.

(4) *Mycology.*—The diseases of plants in Mysore, their causes and prevention, theoretical and practical.

(5) *Entomology.*—Insect pests of Mysore—Practical work in observing and rearing insects.

(6) *Veterinary Science.*—Breeding and care of cattle, etc., diseases and their prevention.

The two years' course may have to be extended in some cases as the entrance qualifications proposed are low and the progress of the student would necessarily be slow in the first year as he would take considerable time to grasp complicated subjects presented in a language not his own.

It is necessary to have a separate course in the vernacular for the sons of raiyats. This may be started later on after a proper agricultural course is organized when it will be possible to get suitable men as instructors out of the men trained in the School, proper elementary text books in the vernacular being prepared in the meantime.

3. *Teaching staff and establishment required.*—The teaching should not be left wholly to subordinate or junior members of the staff and on the return of the two officers who were selected for training in Agriculture and Agricultural Chemistry in England and Germany, their services will be utilized for a part of the teaching work.

For the teaching in Veterinary Science, the services of Mr. Simpson or Mr. Narasimha Iyengar should be made available for one hour a day or less. Some Assistants would also be necessary as instructors so that both teaching and research work may be carried on satisfactorily at the same time. The increase in the staff that will be necessary is as follows:—

- (1) Assistant in Mycology
- (2) Do Botany.
- (3) Do Entomology.
- (4) Do charge of Insectary.
- (5) Do Chemistry.
- (6) Assistant Farm Manager.

The above increase in the staff will, in addition, ensure the presence of an Assistant in each Branch permanently at headquarters to look after long-continued experiments which at present cannot be carried out as both Dr. Coleman and his Assistants have to spend a great part of the year on tours.

Proceedings of the Government of His Highness the Maharaja of Mysore,

The menial staff also requires strengthening.

4. *School building and students' quarters.*—As a temporary measure the following plan is proposed. All training and lecturing in Botany, Zoology and Chemistry can be done in the present Agricultural Chemist's Office building. The two rooms which are at present being used as Assay and Store rooms may by suitable adjustments be converted into a Chemical Laboratory and a combined lecture hall and Botanical and Zoological Laboratory. These rooms will accommodate from 15 to 20 students. The lecture and work in the laboratory should be confined to three days in the week during the 1st year. The students should be quartered at the Farm and should receive all agricultural training there. The lectures in Agriculture can be given in the room now used by the Farm Manager as an Office, which can be easily fitted up for the purpose. Arrangements have to be made with regard to housing the students and providing for their cooking and mess. If the Manager of the Farm were provided with quarters, the cooly lines he is at present using as a dwelling could be utilized temporarily as quarters for students. A tiffin room has also to be erected either at the Farm or at the Laboratory. On the days on which the pupils have actual manual labour to perform they should have no tiring journey to make. Some sort of transport has also to be provided for the students on the days on which they have to come to the Laboratory for practical work. Three pairs of bullocks and three of Col. Jones' bamboo carts would be sufficient for 15 students.

5. *Extension of the Hebbal Farm.*—The Farm at present consists of about 20 acres of dry and 10 acres of wet land almost all of which is laid out into experimental plots with experiments to extend over several years. To assure the best results the Farm connected with any Agricultural College should contain not less than 100 acres. The land should be as varied as possible so as to allow for the cultivation of a large number of staple crops. Even the increase of 10 acres of dry and 10 acres of wet land already proposed will not be sufficient, but it will serve as a beginning and the question of acquiring the whole village site may be gone into later.

6. *Excursions.*—It is necessary that the students should be sent out for a period of at least four weeks each year to study local conditions in the black cotton soil of the northern part of the State which has distinct characteristics.

7. *Cost of establishing the School during the 1st year.*—

No. R. 6368-409—AGRI. 128-11-1, DATED BANGALORE, 6TH MAY 1912.

ORDER THEREON. --Government have had under consideration for some time the question of providing for agricultural education in Mysore and have considered the scheme submitted by Dr. Coleman at their request.

2. Government generally approve of the proposals submitted by Dr. Coleman as indicated in the outline given in the preamble and are pleased to direct that a lump-sum provision of Rs. 25,000 be made in the budget of 1912-13 for starting the School.

Revenue (Agriculture), dated 6th May 1912.

3. It will be a part of Dr. Coleman's duties in the Agricultural Department to organize and conduct the institution.

4. Mr. Narashimha Iyengar, Superintendent, Veterinary Department, has already been directed to give instruction in Veterinary subjects in the School in Government Order No. R. 1925-7—Agri. 129-10-2, dated 6th October 1911.

5. Dr. Coleman is requested to submit for the approval of Government at an early date detailed estimates of expenditure to be incurred out of the above lump-sum grant and also a prospectus of the school giving full information regarding the details of the training to be given therein.

C. S. BALASUNDARAM IYER,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—Dr. L. C. Coleman, M.A., Ph.D., Officer in charge of the Agricultural Chemist's Office.

The Comptroller, Mysore Government.

The Revenue Commissioner in Mysore.

The other Heads of Departments.

The Deputy Commissioners of Districts.

Exd.—c. v.

*Proceedings of the Government of His Highness the Maharaja of Mysore,
Revenue (Agriculture), dated 7th May 1912.*

RE AD—

Letter No. 394, dated the 1st April 1912, from the Chief Observer in charge of the Mysore Meteorological Department, submitting the Report on Rainfall Registration in Mysore for the calendar year 1911.

No. R. 6418-27—AGRI. 122-11-2, DATED BANGALORE, 7TH MAY 1912.

ORDER THEREON.—Recorded.

2. The work of inspection of the rain-gauge stations in the several districts during the year compared favourably with that of the previous year. But there is much scope for improvement in this respect in the Mysore District, where 34 per cent of the gauge stations were not inspected.

3. The Deputy Commissioners are requested to see that no discrepancies occur between the figures in the monthly statements submitted by them to Government and those supplied by them to the Meteorological office at the close of the year.

4. The average rainfall all over the State during the year 1911 was, on the whole, unsatisfactory, being only 35·15 inches as against 45·12 inches during 1910 and 37·15 inches, the average of the past 41 years from 1870-1910 (both inclusive). The south-west monsoon was very defective in all the maidan districts, while the north-east monsoon was slightly in excess of the average.

C. S. BALASUNDARAM IYER,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Chief Observer in charge of the Meteorological Department.

The Revenue Commissioner in Mysore.

The Deputy Commissioners of Districts.

Exd.—c. v.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Letter No. 7298, dated the 18th January 1912, from the Revenue Commissioner in Mysore submitting a statement showing the standard rates of produce per acre of certain crops in the State, and stating that the rates shown in the statement may be adopted for the present and that they may be revised after further experience.

Statement showing the standard rates of produce (revised figures) per acre of different crops.

ORDER THEREON.—Government approve of the rates shown in the above statement being adopted for the present.

2. The Revenue Commissioner is requested to make arrangements to have the figures further tested every year so that it will be possible to obtain reliable figures finally.

3. He is also requested to ascertain the equivalents in pounds (avoirdupois) of the standard rates of the several crops now given in seers of capacity and have them entered in the respective columns.

C. S. BALASUNDARAM IYER,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Letter No. 12172, dated the 16th April 1912, from the Revenue Commissioner in Mysore, forwarding the statement showing the losses in cattle of various kinds during the quarter ending 31st December 1911, together with the accompanying copy of his review thereon.

Official Memorandum.

Subject.—Statements received from the Deputy Commissioners of Districts showing the losses in cattle of various kinds during the quarter ending 31st December 1911.

2. The accompanying statement shows the extent of cattle mortality in the State during the quarter under review, as compared with the corresponding period of the previous year. The total number of deaths from all causes among cattle during the period under review was very much less than in the corresponding period of the previous year. But the mortality among cows, bulls, and bullocks was greater, particularly in the Districts of Kolar and Tumkur. The number of deaths among sheep and goats was noticeably less, being 3,066 less than in the previous year.

No. R. 6685-93—AGRI. 50-11-8, DATED BANGALORE, 15TH MAY 1912.

ORDER THEREON.—Recorded.
